

ASRA DIRECTIVE (Airworthiness)

AD 001/2002.

Effective immediately, and until further notice:

When a gyroplane suffers damage such that any part or component associated with the control system of the gyroplane is broken, bent, stressed or otherwise damaged, the gyroplane is deemed to be unairworthy until that part or component is replaced with serviceable parts or components.

In all cases, all rod ends associated with the control system must be replaced with new parts, and the rod inserts inspected and replaced on condition.

Authority: ASRA Operations Manager.
